Activate:
Microsoft Graph for O365

Proof of Concept

Duration: 2 days | **Focus Area:** MS Graph API | **Difficulty**: 200

Activate Microsoft Graph API introduces an organization to the basics of accessing O365/M365 data via the Microsoft Graph API. This delivery provides your IT staff and support engineers knowledge to successfully leverage the Microsoft Graph API within a tenant to access and manipulate data. This two-day engagement begins with an education session to enhance your team's technical and development skills while driving operational readiness. The offering also includes an onboarding session with a Microsoft engineer, who works with your team to create a process to implement management of an O365/M365 tenant.

◆ OUTCOMES ◆

Activate Microsoft Graph API jump-starts your development and operation teams with necessary skills and knowledge to manage, leverage, and use the MS Graph API within an O365/M365 environment.

01 GET READY

Gain a deeper understanding of Microsoft Graph API
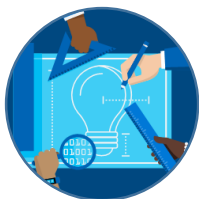

02 LEARN BY EXAMPLE

Apply field tested best practices for development of access and processes within O365

03 BUILD & DEPLOY

Gain knowledge of usage for reports, methods, and procedures to manage O365 services

◆ CAPABILITIES ◆

Build an end-to-end process that can be used as a reference architecture for evolving custom developments.

OUR EXPERTISE

Our trainers are all certified Microsoft Graph engineers with real world experience to guide your team to a successful implementation.

PROVEN CURRICULUM

Our curriculum is industry proven to accelerate the learning curve of most organizations in Office 365 Service Administration.
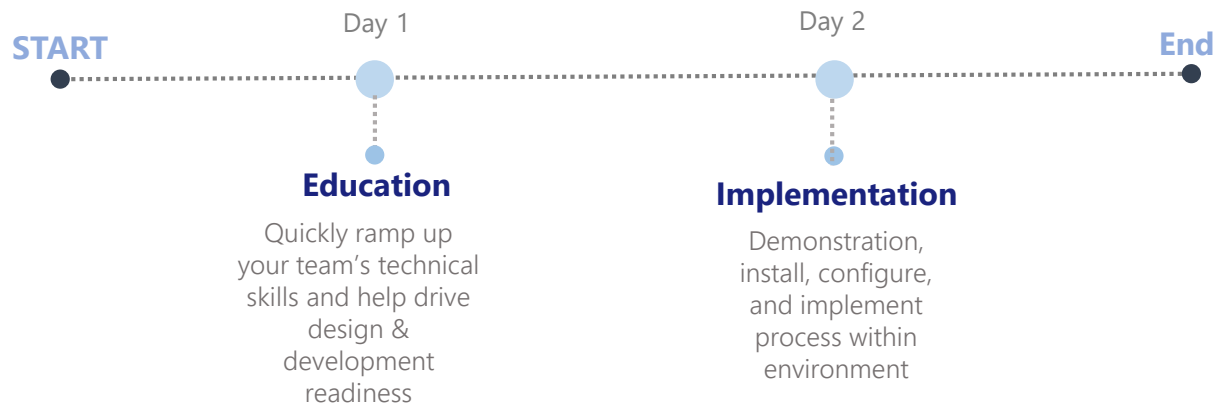

BEST PRACTICES

Microsoft Premier Services aim to get you where you want to go faster, regardless of where you are on the digital journey.

Microsoft

Duration: 2 days

START   Day 1   Day 2   End

ADDITIONAL DETAILS

This service will help O365 Administrators, IT System Administrators, Developers, and Architects explore and reimagine Microsoft O365/M365 capabilities by using Microsoft Graph API.

At the end of the course the attendees will understand the architecture and connection process of the Microsoft Graph API needed to build intelligent reports and control processes as well as gain hands-on experience to apply it immediately to existing and upcoming projects.

This service starts with education about Microsoft Graph API topics needed to build successful queries and connections within the O365/M365 service.

Agenda:
- Introduction to Microsoft Graph
- Solutions available via Microsoft Graph
- Requirements for Microsoft Graph
- Access token setup
- Application registration in Azure AD
- OAuth flows
- Microsoft Graph Explorer summary
- PowerShell and Microsoft Graph usage
- Power Apps access to Microsoft Graph
- Integration with O365/M365 workloads
